

# EnviroDye Aqua

## LAKE COLOURANT & ALGAE SUPPRESSANT

- Not directly toxic to algae and aquatic weeds
- Designed to absorb the wavelengths of light that those organisms need to thrive
- Their natural energy source is reduced & growth is suppressed
- Up to 50Lts per Hectare of water (to avg. depth of 1mtr) to give a concentration of 5 ppm are required to significantly retard strong algae growth

### Directions for use

<i>Situation</i>	<i>Application Rate</i>	<i>Critical Comments</i>
<b>Colourant for Waterways &amp; Lakes</b>	10Ltr per Hectare of water with an avg. depth of 1m = 1Ltr per Megalitre of water	Use rate to beautify lakes & waterways
<b>Algae &amp; Aquatic Weed Suppressant</b>	50Ltr per Hectare of water with an avg. depth of 1m = 5Ltr per Megalitre of water	Use rate to retard strong algae & aquatic weed growth
<b>Turf Colourant</b>	600-800ml per Hectare 6-8ml per 100sq/m 25ml per 5Ltr	For boom application to parks, ovals & fairways For greens For back packs & hand applications
