

PennMulch®

HVO Multi Purpose Spreader

This professional quality, **High Volume Output** spreader handles any job. Spread fertilizers with precision and accuracy, then in just seconds, switch over for high volume products like PennMulch, sand, topdress, lime or salt. Stainless steel components resist corrosion and large pneumatic tires make it easy to push, even when filled to the brim. The precision calibration system includes on-the-fly pattern adjustment and an easy to read calibration indicator. Includes a hopper cover to prevent spills and protect material in inclement weather.

Features of the PennMulch® Professional Spreader

- Converts in seconds from normal output to high volume output
- Hopper is high capacity molded from linear low density polyethylene with 3/16" wall thickness for superior strength and flexibility.
- Frame is 1" diameter and along with all other metal components is made from 300 series stainless steel
- Hopper capacity is 100 pounds!
- Self lubricating Nylatron GS® gears with 4:1 gear ratio provide superior wear and consistent 2 ½ MPH pace
- Nylon 6/6 axel and wheel bearings provide superior wear and load carrying performance
- Precision calibration system including, pattern adjustment and fingertip on-the-fly control
