

PINNACLE

SOIL WETTING AGENT FOR TURF

- Maintain excellent health & vigor & minimise water usage
- Alleviates & prevents dry patch in turf
- Maintains turf health & vigour
- Safe to use on turf & seedlings
- Provides longlasting protection from water repellency

The excellent wetting performance of PINNACLE ensures that the water continues to penetrate throughout the water repellent patches in the soil profile beyond the root ends. The persistent re-wetting effect of PINNACLE allows continuous access for water to maintain excellent turf vigour and plant health.

PINNACLE is very safe to use as it has minimal adverse impact on the development of Ryegrass shoots and roots.

Unlike many soil wetting agents the powerful wetting and penetration performance of PINNACLE does not adversely impact on turf seed germination.

Directions for use

<i>Situation</i>	<i>Application Rate</i>	<i>Critical Comments</i>
Turf Management		Apply in early cool hours of the day & water in well
PREMIUM PROGRAM	20 - 25 L/Ha	Apply in at least 800 - 1000 L/Ha of water carrier
All situations		Apply at 8 weekly intervals or as required
LONGLASTING PROGRAM	50 L/Ha	Apply at 12 - 14 weekly intervals or as required
Golf Greens & Tees	2L/400 sq/m	Apply in at least 1800 - 2000L/Ha water carrier. Water in well immediately after application. Do not leave on the leaf for prolonged periods.
Fairways	15 - 25 L/Ha	
Bowling Greens	7 Ltrs	
Green Tennis Courts	1.5 Ltrs	

Early application of PINNACLE in mid spring with a follow up treatment in mid summer will usually provide good protection from dry patch and water repellency. Spot treatments with a hand gun can be used to treat problem spots if they occur.

Domestic Gardens

Lawns & Flower beds 15 mL/10L 15mL in a 10ltr watering can treats 3 sq/m. Water in well.

Horticulture

General Use 1.5L / 1000L Apply PINNACLE to water repellent soils around the base of the plant or tree to achieve good wet coverage.
