Reno-Max

8 - 2 - 8 & Minors

Greens Grade

140 SGN Renovation Fertiliser

RENO-MAX contains 55% Nutrismart Mini which is a carbon based organic fertiliser. Each granule is composed of specially selected natural ingredients, including phosphate rock, weathered coal (lignite), yeasts and other growth material.

RENO-MAX also contains a granular wetting agent (10% by volume) which is a non-ionic, low burn, residual wetting agent which helps to alleviate and prevent problems associated with localised dry spot (LDS).

RENO-MAX will provide up to 12 weeks performance, it has a full trace element package and has minimal burn potential.

The 1:1 ratio of Nitrogen to Potassium is ideal for turf under stress during hot weather and will stimulate rapid growth at renovation. RENO-MAX also provides excellent residual colour and root growth for all turf types.

DIRECTIONS FOR USE:

Turfgrass: Apply RENO-MAX at 4kg/100 sq.mt. for general nutrition. Water in after application.

Renovation: Apply RENO-MAX at 6kg/100 sq.mt. for full turf recovery and root development. Water in after application.

Turf Establishment: Apply RENO-MAX at 12kg/100 sq.mt. as a seedbed preparation incorporated into the top 100mm of the soil.
