

Kerbside

DURATURF® Kerbside contains a blend of fast establishing hardy cultivars ideal for sowing into nature strips and sites under development. Often these sites have limited to no water supply and are devoid of nutrients. DURATURF® Kerbside will ensure turf grass quality is produced for an economical price.

Features

- Diverse species mix
- Rapid establishment, even in difficult sowing conditions
- Suppression of undesirable weeds
- High turf quality even under minimal management inputs

Cultivar	Species	%
Arena	Perennial ryegrass	25%
Joust Prima	Perennial ryegrass	25%
Tambour	Perennial ryegrass	25%
Omni	Chewings fescue	20%
Omni	Highland	5%
