

Matrix

DURATURF® Matrix has been specially designed to stabilise sandy or sandy loam sports fields that receive extensive use. The rhizomatous tall fescue component creates a chicken wire effect, locking the soil particles together, so where turf cover is lost the soil remains stable. This will ensure safe playing conditions, even under the most intensively worn situations.

Features

- Binding strength
- Rhizomatous growth habit
- Rapid establishment
- Increased wear tolerance and recovery

Cultivar	Species	%
Joust Prima	Perennial ryegrass	50%
Arena	Perennial ryegrass	30%
Torpedo 2	Tall fescue	20%

Application Rates

Sowing rate: 30-50 g/m²

Oversowing: 25-35 g/m²

Mowing height

Down to 25 mm
