### DIRECTIONS FOR USE:

Apply WIL-GRO® SLOW K 0-0-51 to actively growing turf at 1.5 to 3 kilograms per 100 m<sup>2</sup>. Use the lower rate for maintenance applications and the higher rate for renovation. Apply to dry turf or foliage and irrigate with 4-6 mm of irrigation. Use only clean, dry, rotary-type spreaders. Do not use a drop-type spreader as the grinding action may destroy the polymer coating of the urea and may increase burn potential.

**SPREADER SETTINGS:** These suggested spreader settings are not intended to replace your normal calibrations. Calibrate your spreader before applying product.
